-

PROJECTS

Betel Leaf Diseases Checker | Mobile Application (On Going)

- Tech Stack – Google Colab, Java, XML
- Core Idea – Help farmers to detect betel leaf diseases. Build using a trained ML model integrated into a Mobile app for instant image-based diagnosis.
- Project Type – Group

BusTrackLK | System (On Going)

- Tech Stack – Dart, Flutter, Firebase, MySQL
- Core Idea – Help passengers to track bus locations, view schedules and book bus tickets. Also have an Option to find lost packages.
- Contain – Passenger App (BusTrackLK), Driver App (BusTrackLK Driver), Admin Panel (BusTrackLK Admin)
- Project Type – Group

Portfolio | Interactive Music instrument with portfolio

- Tech Stack – HTML, CSS, JS
- Core Idea – Developed a personalized portfolio to showcase my capabilities and projects where the user could interactively play a piano while scrolling through.
- Project Type – Individual

Tuition Management App | Mobile Application (Completed)

- Tech Stack – Java, XML, Firebase
- Core Idea – A mobile application for the students and teachers to access the LMS portal to a specific institute where they could use it to upload, download, and check class dates and results through the app.
- Actors – Students, Teachers, Admins
- Project Type – Group

Airline Ticket booking system | Desktop Application (Completed)

- Tech Stack – C#, .NET, XML
- Core Idea – This is an application to reserve airline seats and calculate the total price and get the ticket.
- Project Type – Individual

Garment Management System | Desktop Application (Completed)

- Tech Stack – C#, .NET, XML
- Core Idea – This is an application which automates the whole garment management process including production management, employee management, supplier management and Inventory management.
- Project Type – Individual

Hospital Management System | Web Application (Completed)

- Tech Stack – Java, Spring Boot, HTML, CSS, JS, React, MySQL
- Core Idea – A web application to manage patient's appointments, wards and doctor's appointments.
- Project Type – Group

Hospital Management System | Web Application (Completed)

- Tech Stack – Java, Spring Boot, HTML, CSS, JS, React, MySQL
 - Core Idea – A web application to manage patient's appointments, wards and doctor's appointments.
 - Project Type – Group
-

CERTIFICATIONS AND TRAINING

- **Certificate in Computer Applications** | Zonal Computer Resource Center – Negombo
- **Certificate in PC Assembly and Maintenance** | Zonal Computer Resource Center – Negombo
- **National Cadet Corps (2019 – 2020)**
 - Developed leadership, discipline, and teamwork through active participation in cadet training and events.
